On target to achieve commitment of 88 HDRs

ENGAGING peak bodies and SMEs in developing continuing professional development learning material both online and blended mode

“Improved capacity building, education and training are integral to the CRCLCL’s vision for a globally competitive Australian built environment sector. The CRCLCL is an opportunity to work at a national level, providing targeted education and training programs to meet stakeholder needs. This capacity building is on an unprecedented scale and will position Australia to be amongst the world leaders in sustainability and zero carbon living.”

EMERITUS PROFESSOR DENNY MCGEORGE
CRC for Low Carbon Living Education Leader

“The CRC for Low Carbon Living’s Industry Network includes a broad representation of industry players and provides participants with information on project statistics, project pipelines and other relevant information, and also acts as a key platform for ideas for future research projects generated by industry participants. It gives industry players and SMEs direct access to innovation and capacity building, providing them with competitive advantage as a sector. The Network is proving to be a vital and engaging forum enhancing the capability and value of the CRCLCL, with the potential to continue beyond the life of the CRCLCL into the future nodes.”
